Objective

To secure a challenging position in the software industry where I can leverage my dedication to continuous learning, punctuality, and trustworthiness to contribute to the progress and success of the company. I aim to apply my skills to contribute to the success of the company and drive innovation within the organization.

Work Experience

Main Flow Services and Technologies

Full Stack Developer Intern   Jun 2024 - present

- Developed company webpage with about 4 type of sections used tools are **React.js, HTML, CSS, Bootstrap, and JavaScript.**
- Projects like **Task Manager Application, Interactive Calculator and Product based Web Pages.**

NullClass

Web Developer Intern   Nov 2023 - Jun 2024

- Created an OverStackFlow clone, developed with JavaScript, React.js for dynamic UIs, **Redux for state management,** and **implemented secure authentication.**
- React and Redux are used for **smooth UI interactions** and real-time updates, enhancing user experience and application performance. Implemented features such as question posting and user profiles.

Alass Infotech Solution

Machine Learning Insight Contributor   Jun 2023 - Nov 2023

- UHRS (Universal Human Relevance System) is a **Microsoft platform** that improves **AI and ML systems** by having humans evaluate and label data.
- Tasks include categorizing data, evaluating relevance, and moderating content to ensure high-quality training data for algorithms.

Projects

CodeCraft Portfolio

Designed CodeCraft Portfolio, a personal website that highlights projects, experience, and resume. The site includes smooth animations and interactive UI elements, showcasing technical skills and coding craftsmanship.

Technologies used: React.js, Tailwind CSS, Framer Motion.

Think Helper Pro AI

A modern AI application featuring a responsive interface with a recent tab, a new button, AI reviews, and a concise slogan. It efficiently answers all questions posed by users, ensuring an intuitive and interactive experience.

Technologies used:HTML, CSS, JavaScript, React.js, Context API, Google Generative AI SDK, Vite.

Zen Market - E-commerce

Created Zen Market, a dynamic e-commerce website with product search, contact options, and integrated messaging functionality.

Technologies used: HTML, CSS, JavaScript.

Task Manager Application

Developed a task manager application featuring functionalities for adding items, deleting items, and tracking the number of projects done and finished.

Technologies used: React, HTML, CSS, JavaScript.
